

MyPetMart Website & E-Commerce Development Proposal

A simple, structured, and scalable pet-commerce website with product management, checkout, customer order history, shipping, and admin overview.

Presented by: Invictus Global Tech

Project Objective

Develop a clean, functional e-commerce website for MyPetMart where customers can browse products, place orders, make payments, and view order history through a simple login section.

The admin will manage product details, pricing, and images, and view day-wise order and product tracking reports.

Scope Overview

Customer Website

Product listing, detail pages, cart & checkout

Product Management

Simple admin product add/edit tools

Payments & Shipping

Gateway integration + shipping partner connection

Admin Dashboard

Basic overview of orders and activity

Customer Account

Login, order history, replace/return requests

SEO & Responsive

Basic SEO setup + mobile-friendly design

 Scope is kept simple and practical as per the project budget.

Customer Website Pages

Home & About

Brand landing page and company information

Shop & Product Detail

Product listing page and individual product pages

Cart & Checkout

Seamless cart and order placement flow

Login & Account

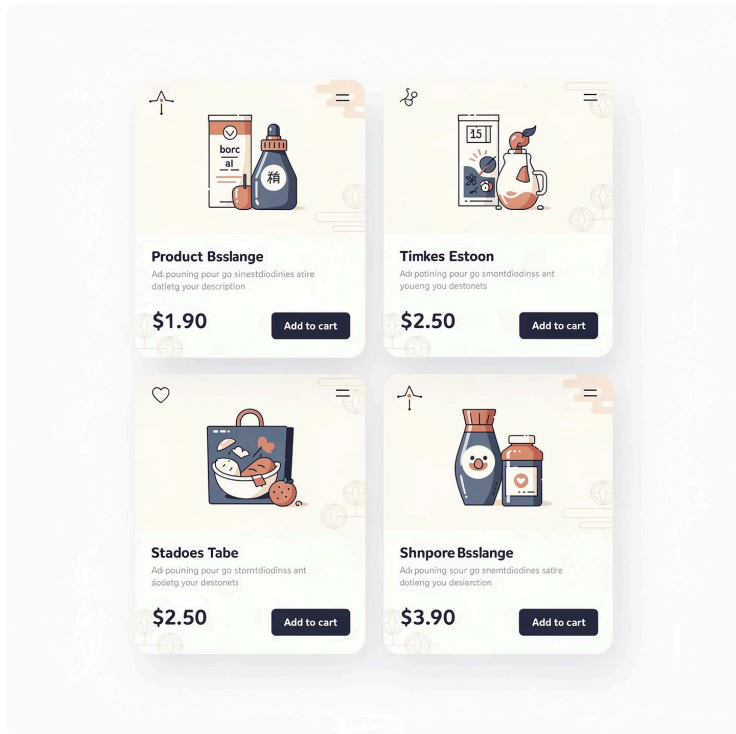

Customer login with order history view

Contact & Policies

Contact page and basic policy pages (if content provided)

Product Listing & Detail Scope

Each product will include **basic product information only**:

Name & Image

Description

Pricing

Category

Add to Cart

Advanced filters, wishlist, comparison, subscriptions, and inventory automation are **not included**.

Cart & Checkout Flow

The checkout process is kept simple and user-friendly, covering cart management, customer detail collection, payment gateway connection, and order confirmation.

Payment & Shipping Integration

Payment Gateway

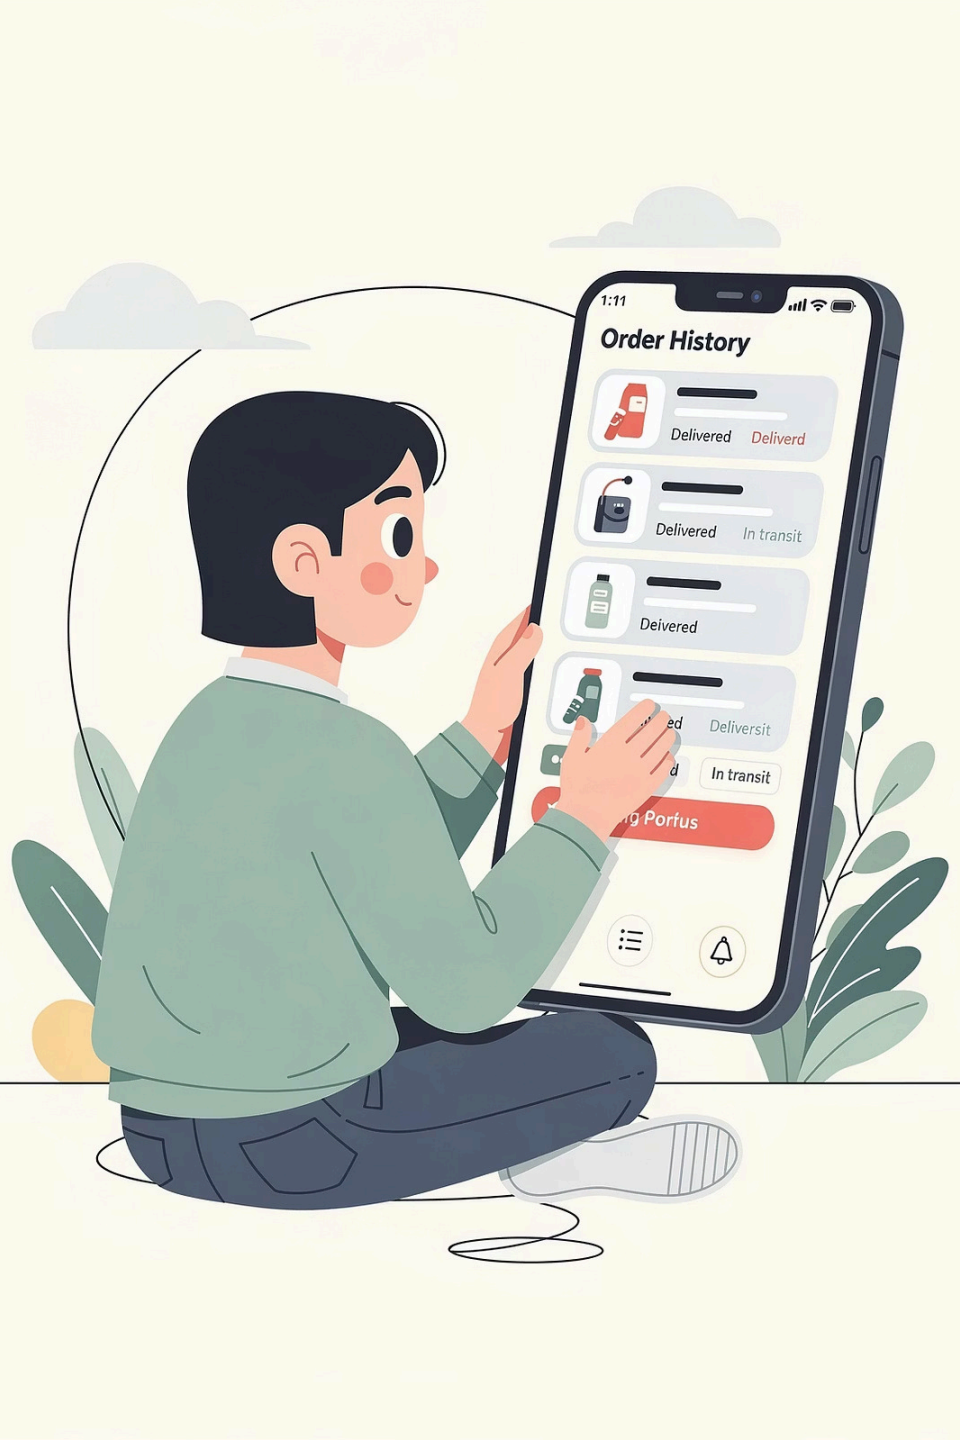

- Payment gateway setup support
- Payment option connection
- Payment confirmation flow

 Account approval, KYC, transaction & settlement charges are handled by the client/provider.

Shipping Partner

- Basic shipping partner integration
- Shipping details linked to order flow
- Basic shipment support

 Account creation, API approval, delivery charges, and courier disputes are handled by the client/provider.

Customer Login & Order History

Login

Secure customer login

Account Info

View basic customer details

Order History

Past and current order details

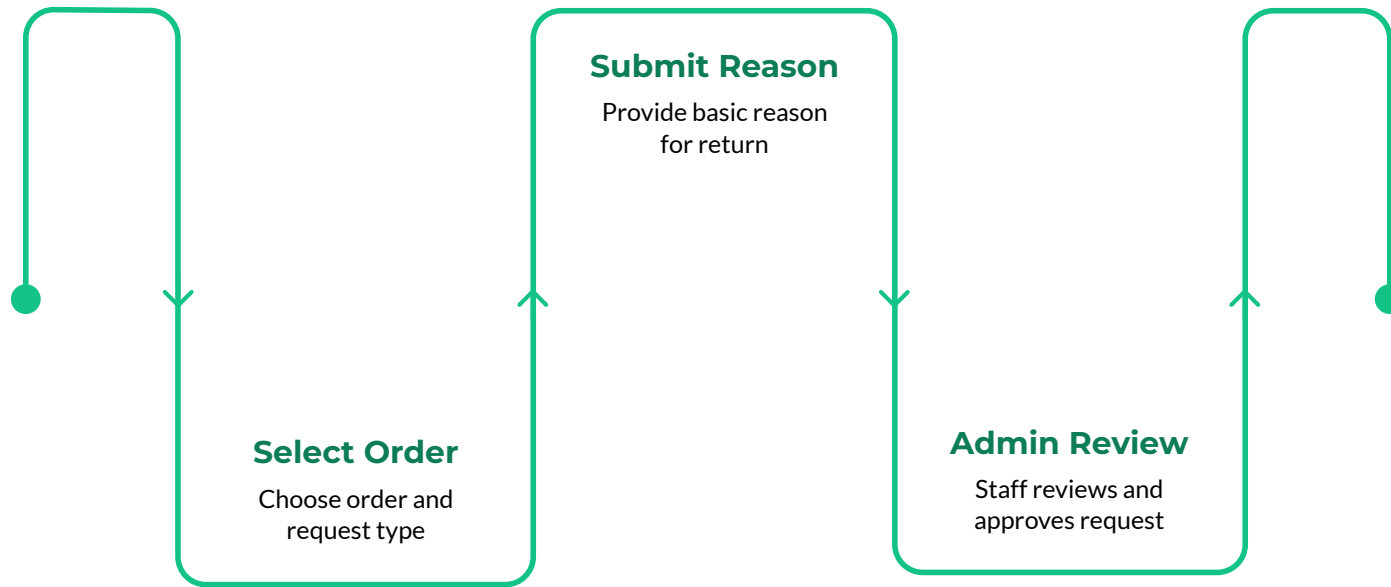

Return/Replace

Submit replace or return requests

This is a simple single-page account area — not a complex multi-page customer dashboard.

Replace / Return Request

Customers can raise a simple replace or return request directly from their order history page.

Not included: Automated refund processing, return pickup automation, approval workflows, and replacement logistics automation.

Product Management & Admin Dashboard

Product Management

Admin can add, edit, and update products including images, descriptions, pricing, and categories.

 Simple and limited to basic product information only.

Admin Overview Dashboard

- Total products & orders overview
- Day-wise order & product tracking
- Basic customer/order activity view
- Replace/return request visibility

 This is a basic overview dashboard — not an advanced analytics dashboard.

Reports, Analytics & SEO Setup

Reports Included

- Day-wise order tracking
- Day-wise product activity
- Basic order count & product performance

 No advanced analytics, profit reports, inventory forecasting, or export automation.

Analytics & Tracking Setup

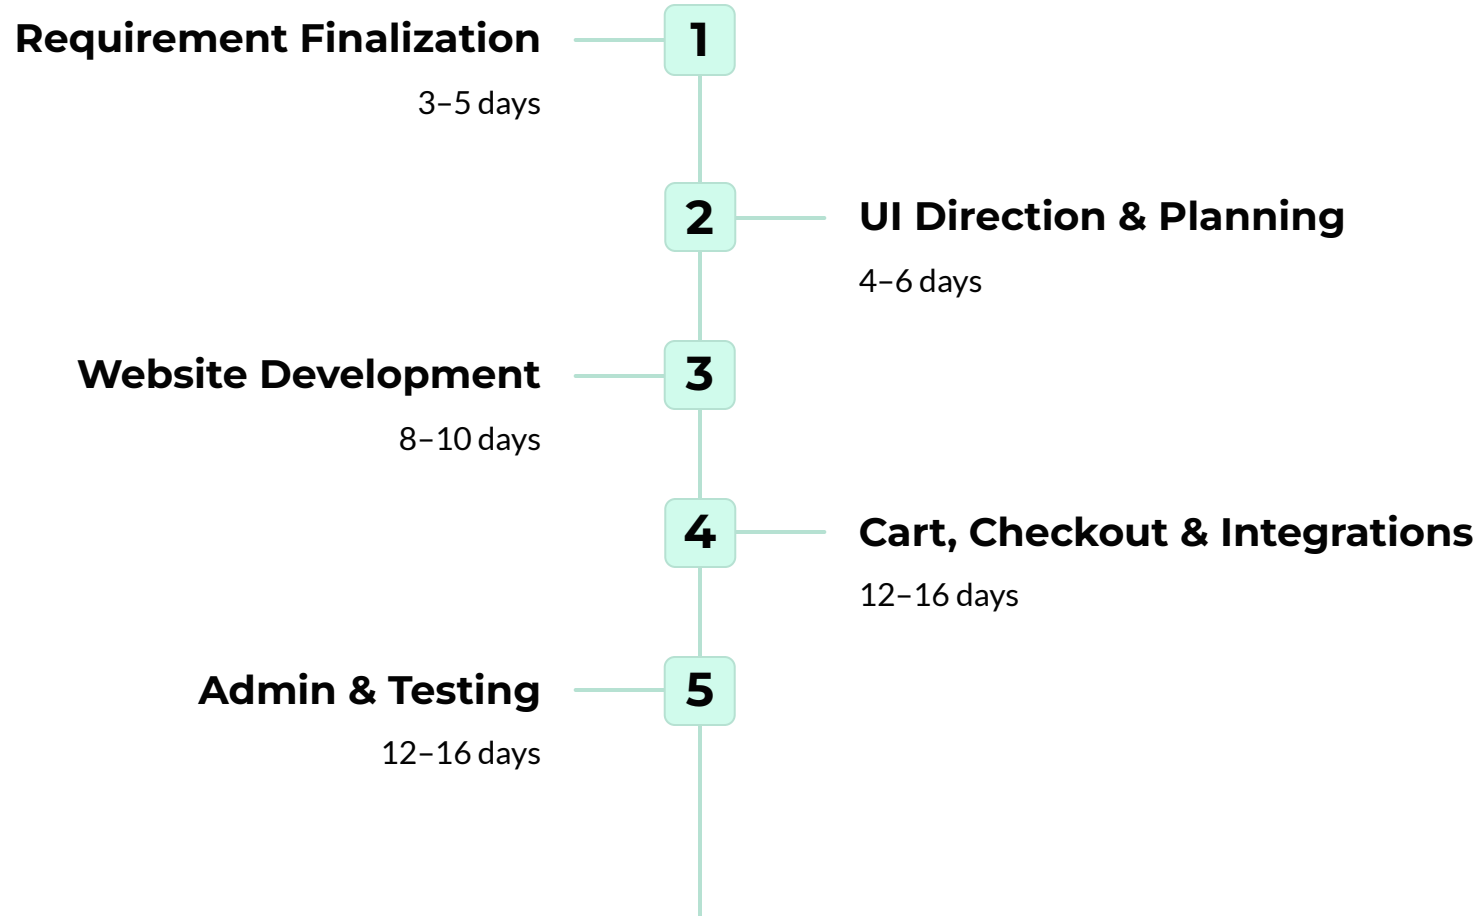

- Meta Pixel setup
- Google Analytics setup
- Microsoft Clarity setup
- Login credentials for all tracking accounts handed over to client

Advanced SEO & AEO Setup

- Page titles & meta descriptions
- Keyword placement
- Image alt text & SEO-friendly URLs
- Advanced XML sitemap setup & submission
- AEO (Answer Engine Optimization) setup for AI search visibility

 No monthly or ongoing SEO service, blogs, backlinks, Google Ads, or ranking guarantees.

Project Timeline

 Total: 35–45 working days — subject to timely content, access, and approvals from the client.

Project Deliverables

01

Responsive Website

Full customer-facing website, mobile-friendly

02

Cart, Checkout & Integrations

Payment gateway + shipping partner connected

03

Customer Account

Login, order history, replace/return option

04

Admin Tools

Product management + basic overview dashboard + day-wise reports

05

SEO & Deployment

Basic SEO setup + deployment support + handover guidance

06

1-Year Website Maintenance

Bug fixes and technical support for 12 months post-launch

Client Responsibilities

Access & Assets

Domain purchase, payment, and renewals are the client's responsibility. Hosting is set up and managed by us for the first year, with the client covering hosting renewal costs after year 1.

Product Content

Product names, images, descriptions, pricing, and category details

Account Details

Payment gateway and shipping partner account details

Timely Approvals

Contact details, policy content, and prompt feedback throughout the project

Delay in sharing these details may affect the project timeline.

Investment & Payment Terms

Total Project Cost

₹35,000

60% Advance

₹21,000 paid before project start

40% Balance

₹14,000 paid after completion, before final deployment/handover

 This pricing applies only to features in this proposal. Additional modules or integrations will be quoted separately.

-  • Hosting managed for the first year; renewal after year 1 is ₹2,000 + GST per year, payable by the client.
- Domain purchase and renewal are the client's responsibility.
- No paid plugins or third-party tool charges are included.
- WhatsApp/SMS/email automation and other paid third-party services will be quoted separately.

Final Summary

MyPetMart — Ready to Launch

Full E-Commerce

Product listing, cart, checkout,
payment & shipping
